2. Due to the remote distance of the office area from the trailer area and the frequent need for after-duty contact with certain key personnel, it is necessary that telephone service be available for contacting these officials.

3. In view of the fact that these telephones were installed at official direction for operational expediency and are used 100% for official use, it is recommended that the Government bear the total cost of these telephones, the amount of which will not exceed approximately \$20.00 per month. The authority for approval is contained in [redacted]
